The Digital Photography Book Scott Kelby 2020-06-11

Learn how to take professional-quality photographs using the same tricks today's top photographers use (surprisingly, it's easier than you'd think)!

This is a completely, totally updated version of the #1 best-selling digital photography book of all time! It's the award winning, worldwide smash hit, written by Scott Kelby, that's been translated into dozens of different languages.

Here's how Scott describes this book's brilliant premise: "If you and I were out on a shoot, and you asked me, 'Hey, how do I get this flower to be in focus, with the background out of focus?', I wouldn't stand there and give you a photography lecture. In real life, I'd just say, 'Put on your zoom lens, set your f-stop to f/2.8, focus on the flower, and fire away.' That's what this book is all about: you and I out shooting where I answer questions, give you advice, and share the secrets I've learned just like I would with a friend—without all the technical explanations and techie photo speak."

This isn't a book of theory—full of confusing jargon and detailed concepts. This is a book on which button to push, which setting to use, and when to use it. With over 200 of the most closely guarded photographic "tricks of the trade," this book gets you shooting dramatically better-looking, sharper, more colorful, more professional-looking photos every time.

Each page covers a single concept that makes your photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of taking shots that look "okay," and if you're tired of looking in photography magazines and thinking, "Why don't my shots look like that?" then this is the book for you.

What's It Like to Be Married to Me? Linda Dillow 2011-02-01 What's It Like to Be Married to Me? is about knowing the difference between having a desire for a better marriage and setting the goal of a better marriage—as readers look in the mirror to see how they can change. Bestselling author Linda Dillow understands that most women want more from their marriage but don't know how to get it. In What's It Like to Be Married to Me?, Dillow challenges readers to ask the riskiest questions: What is it like to be married to me? What

is it like to make love with me? Why do I want to stay mad at you? Extremely intimate and honest, What's It Like to Be Married to Me? is not a book about marriage at all. It is a book about how to live out marriage, day-by-day and year-by-year, and watch who you become as a wife impact the intimacy in your marriage!

De Havilland Tiger Moth Manual Stephen Slater 2010-01-01 The de Havilland Tiger Moth biplane is an iconic and instantly recognizable aircraft. It is also one of a handful of planes that attracts the widest possible recognition outside the specialist group. Of nearly 10,000 built, it is thought that more than 1,000 Tiger Moths still survive over six decades on, and over half remain airworthy. They are also affordable classic aircraft at \$25,000 – \$35,000 for an airworthy example. The authors take a close look at the construction of the Tiger Moth, acquiring and restoring an example, owning and flying one, and the engineer's view of keeping it all running and airworthy.

Global Forest Resources Assessment 2005 Food and Agriculture Organization of the United Nations 2006 Since 1946, FAO regularly monitors the world's forests through Global Forest Resources Assessments. The mandate to carry out these assessments stems both from the basic statutes of FAO and the Committee on Forestry (COFO). Divided into nine chapters, the publication covers the following topics: the extent of forest resources; biological diversity; forest health and vitality; productive functions of forest resources; protective functions of forest resources; socio-economic functions; progress towards sustainable forest management.

Advances in Wheat Genetics: From Genome to Field Yasunari Ogihara 2015-09-15 This proceedings is a collection of 46 selected papers that were presented at the 12th International Wheat Genetics Symposium (IWGS). Since the launch of the wheat genome sequencing project in 2005, the arrival of draft genome sequences has marked a new era in wheat genetics and genomics, catalyzing rapid advancement in the field. This book provides a comprehensive review of the forefront of wheat research, across various important topics such as germplasm and genetic diversity, cytogenetics and allopolyploid evolution, genome sequencing, structural and functional genomics, gene function and molecular biology, biotic stress, abiotic stress, grain quality, and classical and molecular breeding. Following an introduction, 9 parts of the book are dedicated to each of these topics. A final, 11th part entitled "Toward Sustainable Wheat Production" contains 7 excellent papers that were presented in the 12th IWGS Special Session supported by the OECD. With rapid population growth and radical climate changes, the world faces a global food crisis and is in need of another Green Revolution to boost yields of wheat and other widely grown staple crops. Although this book focuses on wheat, many of the newly developed techniques and results presented here can be applied to other plant species with large and complex genomes. As such, this volume is highly recommended for all students and researchers in wheat sciences and related plant sciences and for those who are interested in stable food production and food security.

Lighting for Photographers Joseph Lavine 2019-08-13 Lighting is one of the most important aspects of any photograph. The best images create dimension and drama, which goes beyond formulas and lighting recipes. In Lighting for Photographers: An Introductory Guide to Professional Photography, commercial photographers and instructors Joe Lavine and Brad Bartholomew offer a unique philosophy of lighting, starting with an understanding of the characteristics of lighting to build great shots. Including interviews from professional photographers and illustrated with over 200 images, this book introduces basic photographic concepts and equipment needs, and takes the reader from the lighting process through to starting a successful career in photography both in the studio and on location. Readers will learn a comprehensive approach to lighting including what light does, composition, experimentation, practical tools and techniques, equipment, metering and histograms, and how to launch and grow their career. With downloadable instructor resources featuring discussion questions and quizzes, this fully updated edition is ideal for introductory level photography and lighting courses as well as the amateur photographer looking to apply the appropriate lighting to realize their conceptual and aesthetic goals.

Providing a complete guide to studying the novel in one easy-to-read volume, the book covers: · The form of the novel · The history of the novel, from its earliest days to new electronic forms · Realism, modernism and postmodernism · Analysing fiction: narrative, character, structure, theme and dialogue · Critical approaches to studying the novel · Practical guidance on critical reading, secondary criticism, electronic resources and essay writing · Versions and adaptations *Studying the Novel* also includes a number of features to help readers navigate the book and find key information quickly, including chapter summaries throughout, a comprehensive glossary of terms and an historical timeline on the development of the novel, while annotated guides to further reading and discussion questions help students master the topics covered.

Targeting Enzymes for Pharmaceutical Development Nikolaos E. Labrou 2020 This volume explores detailed methods and experimental protocols evaluating the effect of a compound or a mixture of compounds on the action of enzymes that are significant targets in pharmaceuticals. Consisting of three sections, the book delves into recent biocomputing and bioinformatics protocols, state-of-the-art modern biophysical, electrophoretic, and chromatographic methods and high-throughput screening approaches, as well as detailed protocols and examples of the inhibition analysis and evaluation of selected enzymes. Written for the highly successful *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Targeting Enzymes for Pharmaceutical Development: Methods and Protocols* serves as a vital reference for academics and industry professionals working on expanding our understanding of the wide range of important enzyme targets.

Point Cloud Technologies for Geomorphologists Christopher Gomez 2022-09-22 Starting from concrete examples in Geomorphology, this comprehensive textbook explains to graduate and postgraduate students, point-cloud data technology and associated methods from acquisition to final-product generation. In the last few decades, Geo-sciences have experienced a paradigm shift from the challenge of collecting enough data to the need of creating new processing tools that can handle the billions of data. This shift has come to Geomorphology with the increasing use of surface-pointclouds obtained from photogrammetry, laser scanners and processed by specialist software, and it is thus necessary for the next generation of geomorphologist to be fluent in these technologies. Consequently, this book explains from concrete examples how to use pointcloud technologies, from data collection to processing and final product generation. The philosophy of this book relies on two principles, first: you do not have to be a tech-wizard to use pointcloud technologies, allowing the you to bring back the focus on your science; second pointcloud methods can be affordable, therefore the book provide a set of worked-examples in the different geomorphological environments using open source software and R and Python code samples. The book can be used as a textbook in a geomorphology, geology, physical geography, Sabo-sciences and engineering class, as well as a companion for the more seasoned scientist who wants to solve specific problems.

Plant Response to Stress John D. Tenhunen 2013-06-29 This book is dedicated to international cooperation, understanding and peace. It is the end result of several years of cooperative work between scientists of three countries: the United States, Germany, and Portugal. The work presented, however, draws from a much broader base, hopefully achieving the objective of NATO Advanced Research Workshops, which have been established to allow and stimulate the exchange of new ideas and the synthesis of information by scientists of NATO countries. The tasks of the workshop were several; to review established methodologies that have provided insight into ecosystem function and adaptations of plants in mediterranean climate zones; to examine new methodologies that have recently been applied in ecological studies and have provided new types of information; to summarize recent studies in mediterranean regions of plant water relations, photosynthesis and production, mineral nutrition, plant growth and development, and response to fire; to stimulate in particular an exchange of information among scientists of European Mediterranean countries; and to discuss means by which all of these objectives might be even more effectively achieved in the future through cooperative international research efforts. This variety of themes is clearly evident in the layout of the book. Held in Sesimbra, Portugal in October of 1985, the workshop took place in a ..

In Camera: How to Get Perfect Pictures Straight Out of the Camera Gordon Laing 2020-03-05 With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. *In Camera* is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

The Pot and How to Use It Roger Ebert 2010-09-21 In *The Pot and How to Use It*, Roger Ebert--Pulitzer Prize-winning film critic, admitted "competent cook," and long-time electric rice cooker enthusiast--gives readers a charming, practical guide to this handy and often-overlooked kitchen appliance. While *The Pot and How to Use It* contains numerous and surprisingly varied recipes for electric rice cookers, it is much more than a cookbook. Originating from a blog entry on Roger's popular Web site, the book also includes readers' comments and recipes alongside Roger's own discerning insights and observations on why and how we cook. With an introduction by vegetarian cookbook author Anna Thomas and expert assistance from recipe consultant and nutritionist Yvonne Nienstadt, *The Pot and How to Use It* is perfect for fans of Roger's superb writing, as well as anyone looking to incorporate the

convenience and versatility of electric rice cookers into his or her kitchen repertoire.

A Moment in the Sun John Sayles 2011-10-18 It's 1897. Gold has been discovered in the Yukon. New York is under the sway of Hearst and Pulitzer. And in a few months, an American battleship will explode in a Cuban harbor, plunging the U.S. into war. Spanning five years and half a dozen countries, this is the unforgettable story of that extraordinary moment: the turn of the twentieth century, as seen by one of the greatest storytellers of our time. Shot through with a lyrical intensity and stunning detail that recall Doctorow and Deadwood both, *A Moment in the Sun* takes the whole era in its sights—from the white-racist coup in Wilmington, North Carolina to the bloody dawn of U.S. interventionism in the Philippines. Beginning with Hod Brackenridge searching for his fortune in the North, and hurtling forward on the voices of a breathtaking range of men and women—Royal Scott, an African American infantryman whose life outside the military has been destroyed; Diosdado Concepción, a Filipino insurgent fighting against his country's new colonizers; and more than a dozen others, Mark Twain and President McKinley's assassin among them—this is a story as big as its subject: history rediscovered through the lives of the people who made it happen.

Professional Results With Canon Vixia Camcorders Warren Bass 2012-06 We're in the midst of a digital media-making revolution--and the Canon Vixia G10 and XA10 camcorders are at the forefront. Blurring the line between "prosumer" and professional, the G10 and XA10 are sharper, cleaner, more compact, more portable, and boast more professional features than any prior palm-sized camcorder in their price range. This book is a comprehensive field guide to the concepts, strategies, equipment, and procedures for achieving the best results possible with Canon's top-of-the-line palm-sized camcorders. The guide focuses on the specific features of the Canon Vixia HF G10 and XA10, but users of other camcorders in the Vixia series, the Legria series (shooting PAL), and other camcorders will find a wealth of relevant information. With a high-definition palm-sized camcorder such as the Canon Vixia G10 or XA10, your potential is limited only by your imagination and your resourcefulness.

AYURVEDIC GARBHA SANSKAR Dr. Shri Balaji Tambe 2020-05-09 Originally written in Marathi, 'Ayurveda Garbha Sanskar' is a book that serves as a guide to a couple who are looking to start a family, starting out by getting pregnant, giving birth to a healthy child and nurturing the little one. The book comprehensively provides people everything that a person wants to know about conceiving, pregnancy and delivery to nurturing the little one for up to 2 years of age. Not simply a book laden with known-lectures, rather this book can be seen as an elaboration of various ancient Ayurvedic practices that leads to the complete well-being of the mother and child's physical, spiritual and psychological health. It also advises on the traditional herb mixes, yoga, music and mantras that the new-mothers or the mothers-to-be may find helpful. Besides, this book also charts a nutritious Ayurvedic diet-plan for the couples to detoxify their bodies and be healthy in the right sense of the term. Once a mother conceives, she must be able to nourish and condition the little one in her womb. Likewise, this book also provides a month-by-month nutrition plan that helps in proper nourishment of the baby. Yoga and full-body herbal oil massages during pregnancy are also recommended for the mothers-to-be along with a list of health tonics prescribed in this book. In order to reach out to more people worldwide, this book has been translated in English, and is available in hardcover.

Your Movie Sucks Roger Ebert 2007-03-01 Roger Ebert's *I Hated Hated Hated This Movie*, which gathered some of his most scathing reviews, was a best-seller. This new collection continues the tradition, reviewing not only movies that were at the bottom of the barrel, but also movies that he found underneath the barrel. From Roger's review of Deuce Bigalow: European Gigolo (0 stars): "The movie created a spot of controversy in February 2005. According to a story by Larry Carroll of MTV News, Rob Schneider took offense when Patrick Goldstein of the Los Angeles Times listed this year's Best Picture nominees and wrote that they were 'ignored, unloved, and turned down flat by most of the same studios that . . . bankroll hundreds of sequels, including a follow-up to Deuce Bigalow: Male Gigolo, a film that was sadly overlooked at Oscar time because apparently nobody had the foresight to invent a category for Best Running Penis Joke Delivered by a Third-Rate Comic.' Schneider retaliated by attacking Goldstein in full-page ads in *Daily Variety* and the *Hollywood Reporter*. In an open letter to Goldstein, Schneider wrote: 'Well, Mr. Goldstein, I decided to do some research to find out what awards you have won. I went online and found that you have won nothing. Absolutely nothing. No journalistic awards of any kind. . . . Maybe you didn't win a Pulitzer Prize because they haven't invented a category for Best Third-Rate, Unfunny Pompous Reporter Who's Never Been Acknowledged by His Peers. . . .' Schneider was nominated for a 2000 Razzie Award for Worst Supporting Actor, but lost to Jar-Jar Binks. But Schneider is correct, and Patrick Goldstein has not yet won a Pulitzer Prize. Therefore, Goldstein is not qualified to complain that Columbia financed Deuce Bigalow: European Gigolo while passing on the opportunity to participate in *Million Dollar Baby*, *Ray*, *The Aviator*, *Sideways*, and *Finding Neverland*. As chance would have it, I have won the Pulitzer Prize, and so I am qualified. Speaking in my official capacity as a Pulitzer Prize winner, Mr. Schneider, your movie sucks."

Precision agriculture '13 John V. Stafford 2013-07-01 Precision agriculture is now 'main stream' in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Research continues to be necessary and needs to be reported and disseminated to a wide audience. This book contains peer reviewed papers presented at the 9th European Conference on Precision Agriculture, held in Lleida, Spain. The papers reflect the wide range of disciplines that impinge on precision agriculture: technology, crop science, soil science, agronomy, information technology, decision support, remote sensing and others. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers and professionals in agriculture long after the conference has finished.

Candy Girl Diablo Cody 2005-12-29 Decried by David Letterman (tongue in cheek) on CBS TV's *The Late Show* to be the pick of "Dave's Book Club 2006," *Candy Girl* is the story of a young writer who dared to bare it all as a stripper. At the age of twenty-four, Diablo Cody decided there had to be more to life than typing copy at an ad agency. She soon managed to find inspiration from a most unlikely source—amateur night at the seedy Skyway Lounge. While she doesn't take home the prize that night, Diablo discovers to her surprise the act of stripping is an absolute thrill. This is Diablo's captivating fish-out-of-water story of her yearlong walk on the wild side, from quiet gentlemen's clubs to multilevel sex palaces and glassed-in peep shows. In witty prose she gives readers a behind-the-scenes look at this industry through a writer's keen eye, chronicling her descent into the skin trade and the effect it had on her self-image and her relationship with her now husband.

Using Japanese Paper for Digital Printing of Photographs Carl-Evert Jonsson 2021-05-17 Digitally printing photos on Japanese paper can yield tremendous results for photographers who are interested in experimenting with new methods. But beware: The common concept of how photographs should look will be challenged if you decide to use this technique. Carl-Evert Jonsson shares his experiences using the experimental technique in this book. After using Japanese papers (washi) for paintings and collages, he started to use the papers for his photos. This technique is not an alternative to classic film-based photography. Ink is injected from a cartridge in a printer connected to a computer and printed on paper, in this case on washi. Darkroom facilities are not needed. All you need is a computer, printer, washi, and photos. The liveliness of washi fibres gives a softer result, and washi is more absorbent than Western papers, with the ink appearing integrated rather than sitting on the printed surface. Find out how to use a method that will give new life to photos with the insights in *Using Japanese Paper for Digital Printing of Photographs*.

Physiology of Crop Production N.K. Fageria 2006-05-16 This single volume explores the theoretical and the practical aspects of crop physiological processes around the world. The marked decrease over the past century in the land available for crop production has brought about mounting pressure to increase crop yields, especially in developing nations. *Physiology of Crop Production* provides cutting-edge research and data for complete coverage of the physiology of crop production, all in one source, right at your fingertips. This valuable reference gives the extensive in-depth information soil and crop professionals need to maximize crop productivity anywhere the world. Leading soil and plant scientists and researchers clearly explain theory, practical applications, and the latest advances in the field. Crop physiology is a vital science needed to understand crop growth and development to facilitate increases of plant yield. *Physiology of Crop Production* presents a wide range of information and references from varying regions of the world to make the book as complete and broadly focused as possible. Discussion in each chapter is supported by experimental data to make this book a superb resource that will be used again and again. Chapter topics include plant and root architecture, growth and yield components, photosynthesis, source-sink relationship, water use efficiency, crop yield relative to water stress, and active and passive ion transport. Several figures and tables accompany the extensive referencing to provide a detailed, in-depth look at every facet of crop production. *Physiology of Crop Production* explores management strategies for: ideal plant architecture maximizing root systems ideal yield components maximizing photosynthesis maximizing source-sink relationship sequestration of carbon dioxide reducing the effects of drought improving N, P, K, Ca, Mg, and S nutrition improving micronutrient uptake *Physiology of Crop Production* is an essential desktop resource for plant physiologists, soil and crop scientists, breeders, agronomists, agronomy administrators in agro-industry, educators, and upper-level undergraduate and graduate students.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Votes, Party Systems and Democracy in Asia Jungug Choi 2012-04-27 This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.

The Guys Anne Nelson 2008-11-12 First performed in a hit off-off-Broadway production, and soon to be a film starring Sigourney Weaver and Anthony LaPaglia, *The Guys* is a timeless drama about the surprising truths people can discover in ordinary lives, and the connections we make with others and ourselves in times of tragedy. Paralyzed by grief and unable to put his thoughts into words, Nick, a fire captain, seeks out the help of a writer to compose eulogies for the colleagues and friends he lost in the catastrophic events of September 11, 2001. As Joan, an editor by trade, draws Nick out about “the guys,” powerful profiles emerge, revealing vivid personalities and the substance and meaning that lie beneath the surface of seemingly unremarkable people. As the individual talents and enthusiasms of the people within the small firehouse community are realized, we come to understand the uniqueness and value of what each person has to contribute. And Nick and Joan, two people who under normal circumstances never would have met, jump the well-defined tracks of their own lives, and so learn about themselves, about life, and about the healing power of human connection, through talking about the guys.

Power and Care Tania Singer 2019-05-07 Leading thinkers from a range of disciplines discuss the compatibility of power and care, in conversation with the Dalai Lama. For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics. Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M.
